

PICCOLO INU

WHITEPAPER

PICCOLOINU

Piccolo Inu is a community-driven token on the Ethereum Mainnet. We created \$PINU to provide our holders with leading tokenomics within the DeFi space. Our frictionless generation protocol makes you earn passive income without having to do anything at all.

Static Rewards are a new and innovative solution to many issues. Firstly, rewards are directly correlated to the amount of trading volume at any given time. This type of system allows for a better, fairer, and more all-around balanced experience for holders.

Oftentimes farms have unsustainable APYs that end up only rewarding the earliest buyers, those who buy later often have to deal with an impossible amount of sell pressure. Static rewards prevent this from happening.

Also, the reflection aspect of the mechanics works as an incentive to holders, since the number of earnings depends on the overall percentage of total tokens held.

This system is arbitrage-resistant, is able to capture trading volume with Piccolo Inu and use it to reward holders' wallets and build up liquidity for the ecosystem.

This guarantees that the liquidity pool continues to increase while at the same time helping deter bots & swing traders.

TOKENOMICS

Piccolo Inu token (\$PINU) is a deflationary Ethereum Mainnet token. The \$PINU token will be launched on October 2021. Stealth launch with a supply of 100 trillion tokens.

With an ever-decreasing supply, the \$PINU release will be as follows:

- Contract deployed on the Ethereum Mainnet. Anti-sniper, anti-whale, maximum wallets functions will be added to the Smart Contract to ensure a FAIR and SAFE environment for the ENTIRE community.
- Liquidity will be locked.
- Contract will be verified on EtherScan.

Launch	22. October 2021
Network	ERC-20
Initial Supply	100 trillion
Marketing fee	5%
Liquidity fee	2%
Redistribution to holders	2%
Total fee	9%

OUR VISION

Piccolo Inu aspires to be the most popular token in the Ethereum Mainnet for trading and exchanging gaming NFTs.

The vast nature of this marketplace will be ensured by the popularity of blockchain gaming.

Furthermore, an easy-to-use interface will be available for organizing auctions, including ones for charitable purposes.

The BETA Piccolo Inu's NFTs has already been designed, and will be available for auction after the token's launch. These NFTs have exclusively been created by a professional NFT trading card designer.

These NFTs will serve a purpose in the near future, as a trading card game will start developing as the token grows. It will consist on a trading card battle game, where the gamers will hold a unique deck consisting on various NFTs card, with which the players will be able to fight with and gain prizes. The game will consist on various levels and worlds, following the Dragon Ball timeline.

NFT TRADING CARDS GAME

Blockchain gaming has a lot of benefits, thus more and more blockchain games are appearing on the market. With the growing popularity of those games and vast number of DB fans, the Piccolo Inu's NFT Trading Game will grab the attention of many.

The forms of content that can be "tokenized" and transformed into an NFT are now limited to the bare minimum. We at Piccolo Inu are focused on the gaming market, and we want to give an easy-to-use and smooth NFT experience to content developers and players. Because the technology is still in its infancy, now is a great time to get into the industry, as demand for digital art continues to climb.

NFT BETA PROJECT

The BETA Piccolo Inu's NFTs has already been designed, and will be available for auction after the token's launch. These NFTs have exclusively been created by a professional NFT trading card designer.

These NFTs will serve a purpose in the near future, as a trading card game will start developing as the token grows. It will consist on a trading card battle game, where the gamers will hold a unique deck consisting on various NFTs card, with which the players will be able to fight with and gain prizes. The game will consist on various levels and worlds, following the Dragon Ball timeline.

ETHEREUM BLOCKCHAIN GAME STORE

We know that the ability to easily exchange in-game assets without the participation of intermediaries is among the core benefits of gaming on blockchain.

However, we also know that there're exclusive items that are meant to be distributed via selected partners, and Piccolo Inu aims to become such a partner for a wide range of blockchain game developers.

ROADMAP

PHASE I

- Telegram Community is created
- Website Launch
- Beta NFTs designed
- Primary Social Media created
- Contract creation and verification
- Stealth launch
- Liquidity Locked
- Spread the word on more social media platforms
- Telegram promo on top Channels
- Twitter promo by top influencers
- Reach 100 holders milestone
- Top Coin Listings (Coinvote, coinsniper, coinhunt...)
- NFTs available for auction on Opensea
- Apply on Coingecko & CoinMarketCap

PHASE II

- Strong Marketing Campaigns by recognized influences from the gamer and crypto industry.
- Various Youtube videos promos
- Release DAPP and complex functions for the official website
- Contract Audit
- Collaboration with companies in the gaming industry
- Battle Crypto Game will start developing

ROADMAP

PHASE III

- Live AMA (Twitch)
- Community Building
- Continue to grow our engineering team
- Merch Marketplace Launch
- Gaming content on blockchain and crypto for general public.

PHASE IV

- Continuous Marketing and Influencers Collabs
- Virtual Events and Trading NFTs card battles
- NFT staking and mining
- Listing on Top exchanges
- Further ecosystem development

HOW TO BUY

1. Create a Metamask or Trust Wallet

Create a MetaMask or Trust Wallet using either a desktop computer or an iOS/Android mobile device. That will allow you to buy, sell, send, and receive \$PINU.

2. Connect your wallet to UniSwap

Access your wallet to UniSwap by clicking 'Connect to a wallet' and selecting your wallet.

3. Send ETH to your wallet

You can buy Ethereum (ETH) directly on MetaMask or transfer it to your MetaMask or Trust Wallet from exchanges like Coinbase, Binance, etc. Make sure to use the ERC-20 network when transferring ETH.

4. Swap ETH for \$PINU

You can start swapping as soon as you have ETH available! Press 'Select a token' and enter the token address or search for it on the tokens list.
